SUMMARY

Computer Science undergraduate at SRM University AP with hands-on experience in full-stack web development, machine learning. Proficient in building end-to-end applications using the MERN stack, Python-based ML pipelines, and cloud CRM solutions. Seeking opportunities to apply technical skills in software engineering and data-driven problem solving.

EDUCATION

SRM University AP

Amaravathi, India

B.Tech. Computer Science and Engineering

Aug. 2023 – May 2027

- **Cumulative GPA:** 7.54/10

EXPERIENCE

Edubot Technologies

Full Stack Developer Intern (MERN Stack)

June 2025 July 2025

Remote

- Completed an intensive 8-week program focused on MERN stack development (MongoDB, Express.js, React.js, Node.js).
- Developed a full-stack Expense Tracker application with frontend using React + Vite (Tailwind CSS) and backend using Node.js/Express.js with MongoDB Atlas.
- Implemented responsive UI, client-side routing, and RESTful APIs for adding, tracking, and deleting expenses.

PROJECTS

LearnWeave | Next.js, TypeScript, PostgreSQL, OpenAI API,

- **Built an AI-powered course generation platform** using Next.js, TypeScript, and OpenAI GPT-4 API that automatically creates complete courses with lessons and YouTube videos from user topics in 2-3 minutes.
- Integrated YouTube Data API and OpenAI to automatically recommend relevant educational videos for each lesson with real-time metadata integration and quality filtering.

RhythmicTunes | React, Tailwind CSS, Shadcn/ui, Vite

- Created a music streaming app with full playback controls, shuffle, repeat modes, and playlist management using **React Context API** for state management.
- Designed a responsive UI with **dark/light theme** support, genre-based browsing, artist collections, and a personal library tracking listening statistics.

Expense Tracker | React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB

- Architected and deployed a secure full-stack **MERN** application with JWT authentication, protected routes, and role-based access control (RBAC).
- Implemented centralized state management using React Context API, enabling real-time dashboard updates, advanced filtering, and CSV data export.

SKILLS

Languages: Python, JavaScript, HTML/CSS, SQL, Go,

Frameworks: React.js, Node.js, Express.js, Tailwind CSS, PHP, Astro,

Libraries: scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Socket.io, PixiJS

Databases: MongoDB, PostgreSQL, MySQL

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, PowerBi, Lightning App Builder

Concepts: Machine Learning, REST APIs, Data Visualization, CRM Development, Responsive Design
